Summary

Assistant professor, Head of Engineering Projects Management Department, School of Engineering, The Libyan Academy for Postgraduate Studies.

My qualifications and experience are mixture of Engineering and Management background. Started my career as a Materials Engineer at Tajura Nuclear Research Centre-Libya in 1984, promoted section head since 1996. From the time when I've awarded an M Sc in "Engineering and Manufacturing Management" from Coventry University-UK in 2000, the area of interest was changed to Quality Management. I'm an IRCA (International Register for Certified Auditors) registered Quality auditor. Worked with many organisations implementing Quality Management System. More focus on TQM during my PhD study has strengthened my knowledge on Quality aspects and Research Methodology. My experience in standards started at LNCSM in 2002. A member of Arab Quality Experts within Arab Industrial development, Standardization and Mining Organization (AIDMSO).
